Demonstration of Proposed Features

Part 8 – Project Demonstration | Individual Project

Project: EV Market Performance & Insights

Project Type: Individual Project

Prepared by: Joha Khan

Date: 31 October 2026

Demonstration of Proposed Features

The following entries describe the features visible in the completed Tableau workbook and the submitted demonstration. They are recorded as implemented only where they are present in the dashboard/Story screenshots supplied.

S.No	Feature Name	Description	Status	Demonstrated	Remarks
1	KPI summary cards	Displays Total EV Sales (3,420,000), Average Driving Range (429.3 km) and Average Customer Rating (4.265).	Implemented	Yes	Visible at the top of the dashboard.
2	Year-wise sales trend	Line chart showing the yearly sales values from 2021 to 2025.	Implemented	Yes	Shows an upward trend in the displayed data.
3	Category & battery analysis	Bar charts compare EV sales by vehicle category and battery technology (LFP and NMC).	Implemented	Yes	SUV and NMC are the highest categories in the displayed views.
4	Country comparison & map	Country bar chart and geographic map provide country-level and geographic views of EV sales.	Implemented	Yes	Map and country comparison are included in the dashboard.
5	Manufacturer contribution	Pie chart compares the relative sales contribution of manufacturers.	Implemented	Yes	Manufacturer names are shown in the legend.
6	Price-rating analysis & Story	Scatter plot compares average vehicle price and customer rating; Tableau Story presents key observations.	Implemented	Yes	Year filter is also visible on the dashboard.

Feature Implementation Summary

Metric	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate	100% (6 of 6 listed features)

Scope note: The implementation rate applies to the six feature groups listed in this demonstration template, not to every possible feature of a production EV analytics platform.
